

LIMERIC II

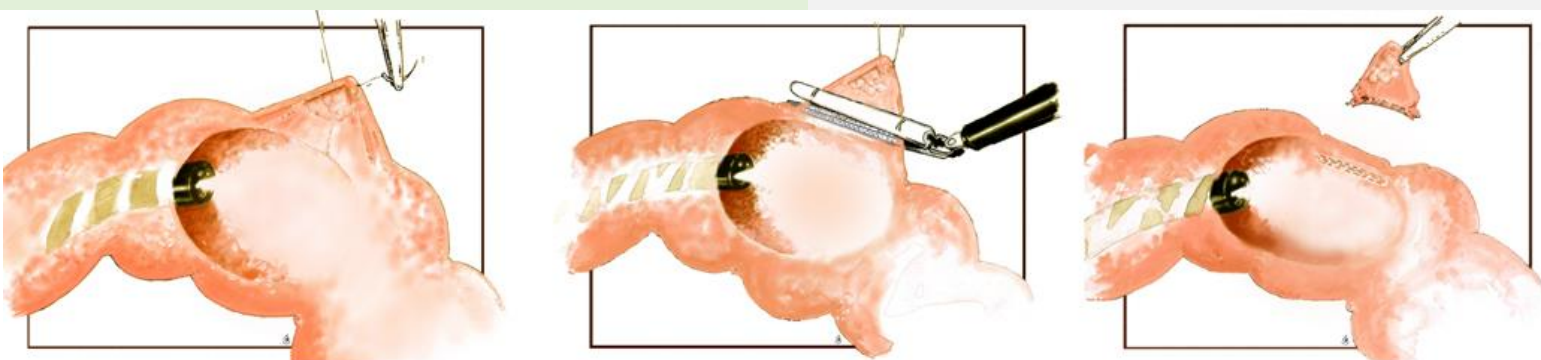

'LIMited wEdge Resection for Colonic T1 cancer'

Inclusion criteria

- Non-pedunculated lesion macroscopic suspected T1 colon carcinoma (and/or histologically proven adenocarcinoma)
- Size < 40mm
- Localized > 25cm proximal from the anus
- Sufficient distance to the ileocecal valve to place the linear stapler

Exclusion criteria

- Rectal carcinoma
- Distant metastasis at baseline
- > 50% circumferential growth
- Prior local endoscopic resection or attempt (lifting not included)
- History of malignancy in the past 5 years

Sent endoscopic images (overview and zoom in white light and NBI) in application format (to be found on limeric.nl) to coordinating investigator

Expert panel opinion

- Suspected for superficial/deep-invasive T1 colon carcinoma?
- Which local resection techniques are possible?
- CAL-WR technically possible?

CAL-WR patient preference?

Inclusion

LIMERIC II
